MEET THE FAMILY

FPG takes care with every cabinet we make.

We focus on designing premium, compliant food and drink display cabinets. Cabinets that achieve sustainable outcomes and operational cost savings through:

- Maximised energy efficiency.
- Extended cabinet lifetime through ease of maintenance and access to support and spare parts for the life of the cabinet.
- Extended food shelf life and reduced food waste.

As markets migrate to natural refrigerants, FPG will support you with options for refrigerated display cabinets.

Options and accessories are available to make the cabinet your own. Select those design and operational features important to you.

From application of custom colour and branded decals, to customer-facing fascia and tray races, we can help you to create brand impact, improve your customer experience, and sell more product.

Let's meet the family.

IMPULSE

Enjoy fast sales. Choose FPG Impulse for instant success.

With a cool core product temperature averaging $+0.5^{\circ}$ – $+2^{\circ}\text{C}$, Impulse refrigerated cabinets are food and dairy-safe. Drinks are deliciously icy cold. Perfect for impulse sales.

Impulse Series is an agile solution for fast-paced retail. It supports multiple display options for integrating impulse food and drink offers into point-of-sale counters, confectionery window run-ups, gondola ends, and ambient aisles. They also make the best islands.

Available in two ranges based on depths, choose the cabinet model which best meets your capacity and location requirements:

Impulse Slim: With a slim depth of only 466mm, Impulse Slim cabinets are so agile. They go anywhere. Ideal when you want to maximise product facings.

Impulse Plus: Need more capacity? With increased depth of 600mm, Impulse Plus provides both the product facings and extra capacity you need for high turnover products. All on a compact footprint.

visair

When business continuity is mission critical.

Dependable, robust, high-capacity food merchandisers.

Visair refrigerated is tested dairy compliant.
Chosen by food retailers for food safety, reliability
and robustness.

Visair heated is engineered with FPG iWave infrared
quartz technology.

Delivers fast heat up times and consistent heat.
Energy efficiency is high - only product on the shelf
is heated, not the surrounding air.

Chosen by food retailers for hot cooked chickens
and meals where core product temperature really
does matter.
